Shop Promotion Plan: US, UAE and Saudi Arabia

Sections 1–7 apply to all three stores (written with US examples). **Section 8** covers what to change for Amazon.ae and Amazon.sa.

Goal: get the first product to **steady daily sales with a healthy ad cost (TACoS under ~15%) within 90 days.**

All tactics below are allowed under Amazon's policies (as of November 2026). Anything that pays for, filters, or incentivises reviews is **not** allowed and is excluded.

---

1. Before launch: make the listing convert

Ads only buy clicks. The listing decides whether those clicks become sales.

- ☐ **Main image**: pure white background, product fills 85% of frame, high resolution (zoomable at 1600px+)
- ☐ **6 more images**: lifestyle in use, size/scale image, infographic of 3 key benefits, what's in the box, comparison vs. generic alternative, close-up of quality details
- ☐ **Video** (30–60 s, phone-shot is fine)
- ☐ **Title**: Brand + main keyword + 2–3 key features + size/quantity. Under 200 characters
- ☐ **5 bullet points**: lead each with the benefit in caps, then the proof
- ☐ **Backend search terms**: synonyms, misspellings, Spanish terms; no repeats, no competitor brands
- ☐ **A+ Content** (needs Brand Registry): comparison chart linking your other products
- ☐ **Price**: within the price band of the top 10 sellers, ideally ending in .99 or .97
- ☐ Ask 5 people to look at the listing for 5 seconds and tell you what the product is and why to buy it

2. Amazon PPC (pay-per-click) launch plan

Week 1–2: Discovery

Campaign	Type	Daily budget	Starting bid
SP – Auto	Sponsored Products, automatic targeting	$10	Amazon suggested bid
SP – Exact	5–10 top keywords, exact match	$10	Suggested bid +20%
SP – Broad	Same keywords, broad match	$5	Suggested bid

- Set campaign bidding to **"Dynamic bids – down only"**.
- Target **launch ACoS of 40–60%**. You are buying sales history and ranking, not profit, in the first 2 weeks.

Week 3–6: Optimise (every 3–4 days)

1. Download the **Search Term Report**.
2. Search terms with **2+ orders** → move to the Exact campaign.
3. Search terms with **15+ clicks and 0 orders** → add as **negative exact**.
4. Keywords with ACoS under target → raise bid 10–15%. Over target → lower bid 10–15%.
5. Add a **Product Targeting** campaign aimed at competitor ASINs that have worse reviews or higher prices than you.

Week 7+: Scale

- Turn on **Sponsored Brands** (headline banner + video) once Brand Registry is active.
- Turn on **Sponsored Display** retargeting to people who viewed your product but did not buy.
- Target ACoS: your **break-even ACoS = profit margin before ads**. Aim to settle 5–10 points below it.

3. Deals and coupons

Tool	When to use	Notes
Coupon (5–20% off)	From day 1	Shows an orange badge in search results; you pay a small fee per redemption. Most cost-effective launch tool.
Prime Exclusive Discount	After 2–4 weeks	Shows a strikethrough price to Prime members.
Lightning Deal	When you have 3+ star rating and enough stock	Time-limited, fee applies; drives a big sales spike that lifts organic rank.
Best Deal	Big events (Prime Day, Black Friday, Cyber Monday)	Needs to be booked weeks ahead.
Social Media Promo Code	When you run social/influencer campaigns	Creates a shareable landing page and code you can track.

> ⚠️ Peak dates: Amazon's **Black Friday Week runs 19–30 November 2026**, and FBA arrival deadlines for it have passed. A new seller should plan the first big push for **January (New Year: fitness, organisation, wellness)** and **Valentine's Day**.

4. Getting reviews within Amazon's rules

1. **Amazon Vine** (Brand Registry required): enrol up to 30 units; trusted reviewers get the product free and write honest reviews. Best way to get your first 5–30 reviews.
2. **"Request a Review" button** in Seller Central for every order, 5–30 days after delivery (or automate it with a tool such as Helium 10 Follow-Up / Jungle Scout).
3. **Product insert** that thanks the customer, gives usage tips and support contact. It may say "leave a review" but must **not** ask for a positive review or offer anything in return.
4. **Excellent customer service**: answer buyer messages within 24 hours, fix problems fast. This prevents negative reviews.
5. ❌ Never: pay for reviews, give refunds/gifts for reviews, ask friends/family, or only ask happy customers.

5. Social media and external traffic

External traffic helps Amazon rank you higher, and with Brand Registry you earn the **Brand Referral Bonus (around 10% of sales from external traffic)** when you use **Amazon Attribution** links.

Channel	What to post	Frequency
TikTok	15–30 s "problem → product solves it" videos, unboxing, before/after. Join TikTok Shop if your category fits.	1 per day
Instagram Reels	Same videos re-cut; product in lifestyle settings	4–5 per week
Pinterest	Product pins linking to your Amazon listing (great for home, kitchen, beauty, pet)	5 pins per week
YouTube Shorts	Reuse TikTok videos	3 per week
Facebook groups	Join niche groups (e.g. pet owners, home organisation); give helpful advice, don't spam	Weekly

Influencers

- Start with **micro-influencers (5k–50k followers)** in your niche. Send free product; pay a flat fee (50–300) for a video if needed.
- Give each influencer their own **Amazon Attribution link** or **Social Media Promo Code** to measure results.
- Join the **Amazon Creator Connections** program (in Seller Central, Brand Registry) so Amazon influencers promote your product for a commission.

Email list

- Put a small QR-code card in the box offering a free guide/recipe e-book or extended warranty (not tied to reviews) to collect customer emails for future launches.

6. Weekly routine

Day	Task	Time
Daily	Read the daily product report; check orders, messages, stock; post one TikTok/Reel	30 min
Mon & Thu	PPC optimisation (search term report, bids, negatives)	45 min
Wednesday	Check reviews, answer questions, update images/A+ if conversion rate is under 10%	30 min
Friday	Inventory planning: reorder when stock = 60 days of sales + supplier lead time	20 min
Monthly	Calculate profit per unit, TACoS, return rate; decide on next product	1 hr

7. Key metrics to track

Metric	Healthy target
Conversion rate (Unit Session %)	10–20%

Metric	Healthy target
ACoS (launch)	40–60%
ACoS (steady)	Under break-even margin
TACoS (ad spend / total sales)	Under 10–15%
Star rating	4.3+
Return rate	Under 5% (category dependent)
Inventory	Never out of stock; 45–90 days of cover

---

8. UAE and Saudi Arabia: what to do differently

8.1 Listings

- Write every listing in **English and Arabic** (Amazon.sa shoppers search mostly in Arabic; Amazon.ae is mixed). Use Arabic keywords in backend search terms, including common spellings in Gulf dialect and Arabizi (e.g. "مبخرة" ,"عباية", "mabkhara").
- Show prices and sizes in local units (AED / SAR, cm, ml). Use images with Gulf-relevant lifestyle settings (majlis, villa kitchens, Ramadan table).
- Make sure your product is **Prime eligible via FBA**: fast delivery (often same/next day in Dubai, Riyadh, Jeddah) is the main reason Gulf shoppers choose Amazon over other sites.

8.2 Ads (PPC)

- Use the same campaign structure as Section 2, with **separate budgets per store**. Do not split evenly: Amazon.sa usually has **cheaper clicks and fewer competitors**; Amazon.ae is more competitive.
- Launch budget guide: **AED 40–80/day** on Amazon.ae, **SAR 40–80/day** on Amazon.sa.
- Run **separate Arabic-keyword and English-keyword campaigns** so you can see which language converts.
- Raise bids in the **evening (after 8 pm)**, and during Ramadan **after Iftar until 2 am**, when Gulf shoppers are most active. Use Amazon's dayparting / schedule rules where available.

8.3 Gulf sales calendar (plan stock 8–12 weeks ahead)

Event	Expected dates	What sells	Store
11.11 Singles' Day	11 Nov	Electronics, beauty, fashion	AE, SA
White Friday	about 20–30 Nov 2026 (deal submission deadline 19 Nov)	Everything; beauty gifting, electronics, home	AE, SA
UAE National Day	2 Dec	Gifting, themed bundles (UAE flag colours)	AE
Dubai Shopping Festival	Dec–Jan	Electronics, fashion, beauty, premium gifts	AE

Event	Expected dates	What sells	Store
New Year / January	Jan	Fitness, wellness, organisation	All
Saudi Founding Day	22 Feb	Gifting, traditional / heritage products	SA
Ramadan	~8 Feb – 9 Mar 2027	Home & kitchen (serving sets, dates boxes, lanterns), food, decor, prayer items, beauty, perfume/oud, gifts	AE, SA (biggest season)
Eid al-Fitr	~9–10 Mar 2027	Gifts, fashion, kids' toys, beauty, perfume	AE, SA
Prime Day	Usually July	Electronics, home	All
Back to school	Aug	Stationery, bags, lunch boxes, kids' tech	AE, SA
Saudi National Day	23 Sep	Green-themed gifting, deals	SA

8.4 Social media in the Gulf

Channel	Why	What to post
Snapchat	Very high usage in Saudi Arabia, especially 18–35	Short how-to videos, behind-the-scenes, Snap ads with "Shop on Amazon" link
TikTok	Huge in KSA and UAE	Arabic voice-over product demos, Ramadan prep videos
Instagram	Main channel for UAE; strong in KSA	Reels, Stories with Amazon links, UGC from customers
X (Twitter)	Popular in KSA for news and trends	Deal announcements around White Friday, Ramadan
WhatsApp Business	How Gulf customers prefer to ask questions	Catalogue + Channel for repeat customers (send them back to Amazon to buy)

- **Influencers:** UAE requires paid influencers to hold an advertiser permit (UAE Media Council); in KSA, influencers need a **Mawthooq** licence. Work only with licensed influencers and ask for their licence number.
- Use **Amazon Attribution** links (where available in your store) or a Social Media Promo Code to measure what each influencer brings.

8.5 Reviews and trust

- **Amazon Vine** and the **Request a Review** button work on Amazon.ae and Amazon.sa as in the US, once Brand Registry is active in that store.
- Gulf shoppers rely heavily on **cash on delivery** and easy returns; FBA handles both. Keep an Arabic-speaking contact for buyer messages.
- The same review rules apply: no paid, incentivised or filtered review requests.
